

# ATyS - ATyS d

Motorised changeover switches  
from 125 to 3200 A

Changeover  
switches

new

## The solution for

- > Non critical buildings
- > OEM

## Strong points

- > Watchdog relay to check product availability
- > Integrated auxiliary contacts.
- > Extended power supply range
- > ATyS d: the dual power supply version

## Conformity to standards

- > IEC 60947-6-1
- > IEC 60947-3

## Enclosed solution

- > Please consult us

## External automatic controller

- > The ATyS and ATyS d are compatible with our ATyS C30 external controllers (for transformer/transformer and transformer/generator applications) and ATyS C40 controllers (for generator/generator applications).

## Function

The **ATyS** and **ATyS d** are three-phase motorised changeover switches with positive break indication.

They enable the on load transfer of two three-phase supplies via remote volt-free contacts, from either an external automatic controller, using pulse logic, or a switch.

They are intended for use in low voltage power systems where interruption of the load supply is acceptable during transfer.

## Advantages

### Watchdog relay to check product availability

ATyS and ATyS d products are equipped with a Watchdog relay which constantly monitors your product, thereby securing the installation.

This relay informs the user of the product's availability, i.e. whether it is operational and ready for source switching.

### Integrated auxiliary contacts

As part of the product monitoring function, the ATyS and ATyS d enable the transmission of information relating to their position.

This is possible thanks to the standard integration of an auxiliary contact for each position.

### Extended power supply range

ATyS and ATyS d products offer greater availability thanks to their extensive power supply range of 208 to 277 VAC  $\pm$  20%.

### ATyS d: the dual power supply version.

In addition to the functions offered by the ATyS S, the ATyS Sd incorporates supply redundancy without the need for additional wiring. This is obtained by integrating a double supply (2 independent supplies) directly within the product.

(1) See "Copper bar connection kits" page

(2) To fully shroud front, rear, top and bottom 4 references required.

To shroud front switch top and bottom 2 references required.

(3) 2 pieces: one for top side and another for bottom side.

(4) Factory mounting only.

(5) An optional key operated Auto/Manual selector is available on request. If required, this option must be requested when ordering the switch (ATyS, ATyS d, t, g and p). To order this option simply add "-K" after the ATyS reference.
